

# HOSPITAL DATA ANALYSIS

PostgreSQL Assignment — Query Results

## PROFESSIONAL RESULTS REPORT

This report reformats the results supplied in the original Results.pdf into a clean, portfolio ready presentation. Missing values are not invented.

Prepared for GitHub / Data Analyst Portfolio

## 1. Executive Summary

The supplied report contains outputs for patient volume, doctor averages, city-level patient totals, department stay duration, the lowest-patient department, and monthly medical expenses.

| Metric                    | Reported Result                         |
|---------------------------|-----------------------------------------|
| Total patients            | 9,347                                   |
| Top department            | Urology — 1,766                         |
| Longest recorded stay     | Apollo Health — Lucknow — ENT — 15 days |
| Lowest-patient department | Cardiology — 544                        |
| Highest reported expense  | Healing Touch — 49,955.41               |

## 2. Question-by-Question Results

### Question 1 — Total Number of Patients

| Total Patients |
|----------------|
| 9,347          |

## Question 2 — Average Number of Doctors per Hospital

| Hospital Name         | Average Doctors |
|-----------------------|-----------------|
| Apollo Health         | 24.70           |
| Healing Touch         | 25.64           |
| Global Medicare       | 28.73           |
| Fortis Care           | 24.55           |
| Sunrise Medical       | 28.63           |
| Green Valley Hospital | 28.88           |
| Heritage Hospital     | 24.67           |
| Metro Hospital        | 27.45           |
| Apollo Health         | 23.36           |
| Wellness Clinic       | 34.00           |

## Question 3 — Top 3 Departments with the Highest Number of Patients

| Department | No. of Patients |
|------------|-----------------|
| Urology    | 1,766           |
| Neurology  | 1,229           |
| ENT        | 1,064           |

## Question 4 — Hospital with the Maximum Medical Expenses

| Hospital      | Reported Medical Expenses |
|---------------|---------------------------|
| Healing Touch | 49,955.41                 |

## Question 5 — Daily Average Medical Expenses Each Hospital

| Hospital Name         | Total Expenses | Total Patients Days | Avg expenses Per Day |
|-----------------------|----------------|---------------------|----------------------|
| City Hospital         | 347988.44      | 81                  | 4296.15              |
| Healing Touch         | 352178.06      | 101                 | 3486.91              |
| Global Medicare       | 329739.45      | 94                  | 3507.87              |
| Fortis Care           | 337677.36      | 77                  | 4385.42              |
| Sunrise Medical       | 233050.93      | 54                  | 4315.76              |
| Green valley Hospital | 162188.83      | 62                  | 2615.95              |
| Heritage Hospital     | 186899.03      | 80                  | 2336.24              |
| Metro Hospital        | 314786.05      | 97                  | 3245.22              |
| Apollo Health         | 277335.09      | 87                  | 3187.76              |
| Wellness Clinic       | 175467.82      | 62                  | 2830.13              |

#### Question 6 — Longest Hospital Stay

| Hospital      | Location | Department | Patients | Admission | Discharge | Stay (days) |
|---------------|----------|------------|----------|-----------|-----------|-------------|
| Apollo Health | Lucknow  | ENT        | 171      | 06-04-23  | 21-04-23  | 15          |

### 3. Location & Department Analysis

#### Question 7 — Total Number of Patients Treated in Each City

| City      | Total Patients Treated |
|-----------|------------------------|
| Jaipur    | 1,505                  |
| Ahmedabad | 1,467                  |
| Lucknow   | 1,264                  |
| Hyderabad | 1,261                  |
| Bangalore | 955                    |
| Chennai   | 840                    |

|         |     |
|---------|-----|
| Kolkata | 596 |
| Pune    | 555 |
| Mumbai  | 483 |
| Delhi   | 421 |

### Question 8 — Average Length of Stay per Department

| Department       | Average Stay (days) |
|------------------|---------------------|
| Neurology        | 9.25                |
| Pediatrics       | 9.11                |
| Urology          | 8.72                |
| Oncology         | 8.11                |
| ENT              | 8.08                |
| Gynecology       | 7.67                |
| General Medicine | 7.43                |
| Orthopedics      | 7.14                |
| Cardiology       | 6.86                |
| Dermatology      | 5.60                |

### Question 9 — Department with the Lowest Number of Patients

| Department | Total Patients |
|------------|----------------|
| Cardiology | 544            |

## 4. Monthly Medical Expenses

### Question 10 — Monthly Medical Expenses Report

| Month   | Total Medical Expenses |
|---------|------------------------|
| 2023-01 | 173,971.54             |

|         |            |
|---------|------------|
| 2023-02 | 301,722.72 |
| 2023-03 | 199,247.42 |
| 2023-04 | 88,995.93  |
| 2023-05 | 222,986.72 |
| 2023-06 | 165,926.36 |
| 2023-07 | 211,527.13 |
| 2023-08 | 181,039.55 |
| 2023-09 | 341,284.23 |
| 2023-10 | 158,450.68 |
| 2023-11 | 334,370.33 |
| 2023-12 | 337,788.45 |

## 4. Data Quality & Presentation Notes

- The analysis results are based on the hospital dataset and the PostgreSQL queries.
- Question 3: The Top 3 Departments result has been presented as provided: Urology (1,766), Neurology (1,229), and ENT (1,064).
- Question 5: values have been included based on the completed analysis results.
- Question 6: The longest stay is presented as the longest recorded hospital stay in the data set. The available data does not include a Patient\_id, so an individual patient cannot be uniquely identified.
- The report focuses on presenting the query outputs clearly and does not modify the underlying dataset.
